

NFT Cognitive

Metaverse interface

CONFIDENTIAL FEBRUARY 2022

Made with VISME

Interacting in the metaverse has to be **intuitive**

The potential in the metaverse is given to you by the accessories, like in the games if you have better tools you **achieve better things**

180M+

Accessories, everyone uses them

Cognitive Accesories

Millions
of users

Viewing the problem

The experience in the metaverse can be frustrating

- Many people are not prepared, they do not know how to start
- The menus are very difficult to manage and are rigid
- The experience should carry more information and more intuitive
- 85% he does not know what to do
- Companies do not know how they can integrate into the metaverse

Human machine interface with NFT

Virtual Reality

The background is a solid cyan color. It features several abstract white geometric elements: three parallel diagonal lines in the top-left quadrant, a thick white bar between two of them; three parallel diagonal lines in the bottom-left quadrant, a thick white bar between two of them; and three parallel diagonal lines in the bottom-right quadrant, a thick white bar between two of them. The text 'The Team' is centered in the middle of the page.
